

SPECIALTY CHEMICALS

A fundamental strategy in AECI's Transformation Programme has been its exit from continuous process, low margin, bulk commodity chemical manufacture in parallel with the vigorous pursuit of specialty businesses with good growth potential. **Part of achieving this new profile has required the realignment of the Group's business portfolio.**

The sale and transfer of specialty businesses to the Chemical Services Group has been a major step in this regard. Chemical Services comprises **21 autonomous businesses**, including five significant joint ventures. Each of these businesses supplies its own, diverse range of chemicals and related services to clearly defined niche markets. **This grouping of small- to medium-sized businesses allows for a market-orientated, customer-focused, service-intensive approach, considered to be the ideal structure for servicing the specialty chemical sector.**
